## CLAIM AMENDMENTS

MAY 16 2007

1 - 17. (canceled)

1 18. (currently amended) In a motor vehicle, the  
2 combination comprising:  
3 a wall formed with a recess;  
4 a hand tool adapted to fit with the recess, [[and]]  
5 formed with a throughgoing hole and of a pair of similarly shaped  
6 secured-together elements, and including a scraper blade fastened  
7 between and projecting at an end from between the elements; and  
8 latch means for releasably securing the tool in the  
9 recess, whereby for use the hand tool can be grasped through the  
10 hole and freed from the recess.

1 19. (currently amended) The combination defined in  
2 claim 18 wherein the hand tool is an ice scraper, screw-driver, or  
3 bottle-opener.

1 20. (previously presented) The combination defined in  
2 claim 18 wherein the vehicle has a center console forming the wall.

1 21. (previously presented) The combination defined in  
2 claim 18 wherein the latch means includes a magnet.

22. (canceled)

Pat. App. 10/725,202

1                   23. (previously presented) The combination defined in  
2                   claim 18 wherein the throughgoing hole is at least as large as a  
3                   standard beverage can, whereby the tool can form part of a cup  
4                   holder.

1                   24. (previously presented) The combination defined in  
2                   claim 23 wherein the opening is generally circular and has  
3                   elastically deformable lips adapted to grip a standard beverage can  
4                   fitted in the hole.

1                   25. (previously presented) The combination defined in  
2                   claim 24 wherein the hole is at least partially of larger diameter  
3                   than the standard beverage can.

1                   26. (previously presented) The combination defined in  
2                   claim 18 wherein the tool is provided with a hard edge suitable for  
3                   use as a scraper.

1                   27. (previously presented) The combination defined in  
2                   claim 18 wherein the tool is elongated and has long sides formed  
3                   with cutouts facilitating gripping of the tool.
